

ARC is an industry leading digital and online risk management information system (RMIS) that enables individuals and organizations to identify and reduce financial risk. We utilize ARC to compile data from multiple sources and display it in meaningful ways, which allows our experts and the organization's leadership to make better decisions and deploy resources to address opportunities and maximize return on investment. ARC also provides a platform that gives organizations visibility to their claims and the strategies being deployed to minimize overall costs. Lastly, ARC has the ability to electronically collect data and display trends and performance using its internal audit/survey function, which is deployable via laptop, tablet, or smartphone.

- A** → **ANALYTICS**

ARC enables organizations to compile data from multiple sources and develop digital, online analytics that illuminate critical trends and performance gaps that create drains on cash flow and profits. ARC also has the ability to display its analytics at each level of an organization in order to improve visibility to specific areas and their unique trends and performance.
- R** → **RISK INSIGHT**

ARC provides critical risk insights that increase the effectiveness of your overall risk management programs. Our tools enable senior leaders, claims and safety professionals to make better decisions concerning their coverage architecture, claims management initiatives and safety strategies. Features including performance and trend analysis, benchmarking, auto generated reporting and notifications as well as customizable data views that quickly identify opportunities for enhanced performance.
- C** → **CLAIMS**

ARC enhances the effectiveness of an organization's claims mitigation strategies by providing easy access to claims histories and current events. ARC also enhances the claims communication process when specific changes to a claim occur (i.e., reserve changes, open/closed, settlements, or litigation) so that they are communicated to appropriate leaders and managers. This, in turn, enables our teams to ensure we have the appropriate resources at the appropriate time to strive for a positive outcome and experience. Claims advocates, risk managers, and other company leaders will be able to quickly act on mitigation strategies in attempts to decrease the overall cost of claims.

Long-Term Benefits Bring You Peace of Mind

The ARC platform enables our teams to develop sound strategies and solutions to guide risk management decisions and enable you and your organization to better grow your business and support your customers, including:

**EXPOSURE AND
LOSS PROTECTION**

CREATE RESILIENCY

**BUILD VALUE
AND GROWTH**

Key Features

INCIDENT & INTAKE MANAGEMENT

ARC's configurable incident intake system allows users to capture and report incident details quickly and accurately. Automate root cause analysis and capture investigation details to determine if corrective actions are needed.

CLAIMS MANAGEMENT

Claims management efforts will create live and immediate updates to the data that the analytics are pulling from. Allows for you to tailor workflows to fit your organization's processes for alerting stakeholders, initiating next steps and reporting to regulatory agencies.

ANALYTICS & REPORTING

Analytics and benchmarking in ARC make data analysis straightforward and fast. Use dashboards, reports, and graphs to gain actionable insight across your entire risk environment.

DATA VISUALIZATION

Mapping over bodies of land, heat maps, road systems, body systems, etc.

AUDIT & INSPECTIONS

With ARC, you can take your inspection and audit processes paperless and mobile, gain more control over the quality of data collected, and spur corrective actions that help prevent losses and keep your safety program compliant.

TECHNOLOGY & SECURITY

ARC is hosted on a secure web-based platform allowing the system functionality and security to continually evolve without the installation or maintenance of any hardware, providing users with a fast, secure, reliable and flexible platform for all of their risk management needs. Users can rest assured that their data is secure in every step of the claim process. ARC maintains compliance with rigorous SOC2 and NIST800-53 security controls and has joined the EU-U.S. Privacy Shield Framework and Swiss-U.S Privacy Shield Framework.
